## WHAT IS A COOKIE?

A cookie is a small piece of data that a website asks a browser to store on a computer or mobile device. A cookie allows the website to “remember” your actions or preferences over time. Most web browsers support cookies. However, you can change your browser settings to reject certain cookies or delete those already stored.

## WHY DO WE USE COOKIES?

On our website, we use only technologies that are necessary to ensure the basic functionality of the site. This includes:

- Essential cookies: used to remember settings such as language selection or user preferences.
- Browser local storage: we store technical data using this technology to ensure proper operation of the application. This data is used solely during the use of the website and does not contain personal data.

We do not use analytical or marketing cookies without your consent.

## WHAT TYPES OF COOKIES DO WE USE?

On our website, we use only essential cookies that enable the proper functioning of the site. We do not use cookies to track your activity or for marketing purposes.

## WHAT ELSE DO WE STORE BESIDES COOKIES?

Our applications may store technical data (identifiers) in the browser’s local storage on your device. This data is used solely to ensure the proper functioning of the application and does not contain personal data.

- Session cookies and persistent data in browser local storage
- Session cookies: temporarily store information about your actions during a single visit to the website and are deleted when you close the browser.
- Browser local storage: we store technical data in the browser’s local storage that enables the application to function correctly.
